Possible signs of hypothyroidism include but are not limited to Hypothyroidism is more common in dogs than cats, but hypothyroidism can occur in felines too, and levothyroxine meds are sometimes prescribed for cats. Regarding canine hypothyroidism diagnosis, your pet's veterinarian may conduct a blood test to view hormone levels should they suspect hypothyroidism, however, testing is not cut and dry and it will often be up to the skill of your veterinarian to properly diagnose the disorder. Once beginning the proper dose of medication your dog will usually look, act and feel much better than they did before they began their treatment. There is also an equine medication as well. Levothyroxine and thyroxine are synthetic thyroid hormones designed to supplement for the body's naturally occurring thyroid hormones when they are not being properly produced. Hypothyroidism - Under Active Thyroid Hypothyroidism, under active thyroid, is a disorder most commonly associated with dogs. The difference is in the manufacturer, form and administration. Even horses can develop thyroid issues, Thyro-L offers an equine levothyroxine powder just for them. Once diagnosed it usually takes trial and error to determine which amount of medications will work best for your specific dog. When you shop online often you will find that the savings on brand name products is so extensive that you will not save much money by purchasing generic meds instead. Pala-tech now offers a convenient chewable tablet medication for your pet that makes it easier to administer their daily dose. Thyroid Meds For Horses. However, some breeds seem to have a particularly higher rate of hypothyroidism including but not limited to, the golden retriever, doberman pinscher, dachshund, greyhound, boxer, sheltie and cocker spaniels. The good news is that when the disease is diagnosed early and treated properly, one can expect their pet to live a long, happy life in spite of their hypothyroid disorder. There are a wide variety of hypothyroid medications on the market but basically they all contain the same main ingredient - levothyroxine sodium. Levothyroxine (active ingredient in Soloxine) is a medication prescribed for dogs and cats to treat conditions associated with hypothyroidism. Save on Step 1.
