No one buys antidepressants on the street. Mania can be euphoric initially. No, antidepressants can't get you high. But you can understand the line of thought asking about recreational properties working on serotonin as the SSRIs do? Maybe the first day you feel a boost but nothing that resembles a high. I don't want to stay on it, but for the short term I can stand to be emotionally blunted a little. Some drugs can produce manic phases like methamphetamine but its limited mostly to bipolar. Pardon my lack of knowledge on the psychology topic, but what exactly do you mean by "manic"? Wiki Research Mission Statement Donate! By society's rules being manic is not good because you can get into all kinds of trouble. No I would not advise taking copious amounts of them that's why is said ill advised. But that's my opinion look around. They only work for short periods like most prescription drugs. SSRI's and recreational value. They do help some people. BlueLight Benzodiazepine Conversion Chart.
