

buy doxycycline for animals

Thu Mar 8 What is Doxycycline Compounded? Access from your Country was disabled by the administrator. Doxycycline Doxycycline is a tetracycline-class antibiotic used by veterinarians to treat animal patients suffering from certain bacterial infections and microorganisms. Unfortunately at this time we only carry the 30 and 60 mL bottles of the medication. What is a Compounded Medication? We'll ask for your vet's info during checkout. Certain drugs, such as iron or calcium supplements, kaolin, antacids, bismuth subsalicylate and some antibiotics have shown to interact with this medication. Doxycycline should not be administered to an animal with a known allergy to the medication or one who has been hypersensitive to it in the past. If the animal experiences hives, swelling of the face, lips or tongue or has difficulty breathing, contact the veterinarian immediately, as these are signs of an allergic reaction. It feels like I am giving my pet a treat. Precautions: Do not give Doxycycline to a pregnant animal as it could cause harm to the offspring. Doxycycline should not be given to nursing animals since this medication may cause slowing of bone growth and discoloration of teeth. Do not give A prescription from your veterinarian is required to purchase Doxycycline. Or your veterinarian may recommend Doxycycline to treat a longer-term disease such as Rocky Mountain Spotted Fever, Lyme Disease, Ehrlichiosis or chlamydia. This medication prevents bacteria from reproducing so the animal's immune system can fight the existing infection. Talk to your veterinarian about the proper.
