News services Your news when you want it. Thursday, 28 July , Our research team collected samples of two commonly used medicines, isoniazid and rifampicin, from neighborhood pharmacies and markets in 17 countries where tuberculosis is pervasive across Africa, Asia, South America and Europe. Finally, they must prosecute and imprison makers of lethal fake drugs. Drug regulators should also confirm that available medicines are really registered where they say they are we found that unregistered medicines were more likely to be substandard. The Food and Drug Administration recently approved a drug called Sirturo, designed to target drug-resistant forms of the disease. Failing pills typically had too little of the active ingredient the molecule that destroys tuberculosis bacteria. Please try again later. If you are on a personal connection, like at home, you can run an anti-virus scan on your device to make sure it is not infected with malware. This is not a problem for just the developing world. And it is run by Dr. These patients could go on to spread a drug-resistant form of the disease, which is deadlier and vastly more expensive to control. Pharmacists will be able to replace the recalled drug. E-mail this to a friend.
