You must remain under the care of a doctor while you are using Clomid. Most patients ovulate following the first course of therapy. Each subsequent course may be started as early as 30 days after the previous course and after pregnancy has been excluded. Your doctor may have you take your temperature each morning and record your daily readings on a chart. Some women using this medicine develop a condition called ovarian hyperstimulation syndrome OHSS, especially after the first treatment. Oligospermia clomiphene, Serophene, More OHSS can be a life threatening condition. If ovulation occurs and pregnancy is not achieved, up to 2 additional courses of Clomid 50 mg orally once a day for 5 days may be administered. Subscribe to receive email notifications whenever new articles are published. We comply with the HONcode standard for trustworthy health information - verify here. If ovulation occurs but you do not get pregnant after 3 treatment cycles, your doctor may stop treatment and evaluate your infertility further. This medication may slow breast milk production in some women. Call your doctor right away if you have any of the following symptoms of OHSS: Use Clomid exactly as directed by your doctor. It causes the pituitary gland to release hormones needed to stimulate ovulation the release of an egg from the ovary. Print this page Add to My Med List.
