Bioequivalence studies are done in the target population, he added, for some drugs known to have clinically different absorption patterns in patients versus healthy individuals. That study also was not blinded, a significant limitation insofar as some individuals may have a bias against generics. If you purchase medications online, be sure you are buying from a reputable and valid online pharmacy. The patent assigns exclusive legal right to the inventor or patent holder, and may include entities such as the drug brand name, trademark, product dosage form, ingredient formulation, or manufacturing process. A patent usually expires 20 years from the date of filing, but can be variable based on many factors, including development of new formulations of the original chemical, and patent infringement litigation. These medications may be counterfeit and potentially unsafe. Nevertheless, Johnston -- a former deputy director of generic drugs at the FDA -- said it had yet to be demonstrated convincingly that variation in blood levels associated with generic drugs had caused clinical problems unique to those drugs. AB Products meeting necessary bioequivalence requirements. But under new regulations that took effect in July, companies have to give the FDA results of failed tests as well as successful ones, and explain why the results differed. Multisource drug products listed under the same heading i. Franck Chenu, PharmD, PhD, of the University of Ottawa, and colleagues recently reported on one of these, a randomized crossover study comparing a generic version of the antidepressant drug venlafaxine with its branded version, Effexor. The third and final installment of this exclusive MedPage Today series will address recent manufacturer recalls of generic drugs and overall safety issues. A Reference Listed Drug RLD is an approved drug product to which new generic versions are compared to show that they are bioequivalent. The FDA requires that generic manufacturers conduct bioequivalence studies that compare blood levels of the generic and branded drug following the normal route of administration and dose. He said it's intended to establish equivalence of formulations, which is easier to do with healthy participants than patients, while still yielding the needed information. In certain instances, a number is added to the end of the AB code to make a three character code i. Fraudulent online pharmacies may attempt to sell an illegal generic version of Effexor XR. A drug patent is assigned by the U.
