Although they contain the same active ingredient and are available in identical strengths, they are not bioequivalent. Are you aware of the implications of these sometimes subtle differences? If you purchase medications online, be sure you are buying from a reputable and valid online pharmacy. Pharmaceutical manufacturers often create new dosage formulations of the same active ingredient. By designating a single reference listed drug as the standard to which all generic versions must be shown to be bioequivalent, FDA hopes to avoid possible significant variations among generic drugs and their brand name counterpart. Apadaz Apadaz acetaminophen and benzhydrocodone hydrochloride is an immediate release combination of Five Tips for Surviving a Hour Several medication error reports have been received over the past several years which indicate a lack of understanding of the product differences between the different formulations of Depakote. Patent and Trademark Office and assigns exclusive legal right to the patent holder to protect the proprietary chemical formulation.
