Zyrtec acts the fastest usually within one hour but is also the most likely to make you drowsy, so avoid driving, alcohol, and sedatives as you figure out how you react. Allegra is the least likely to make you drowsy. Dosage Information in more detail. If your primary symptom is a stuffed up nose, you can also ask your doctor about decongesting nasal sprays. Loratadine and pseudoephedrine can pass into breast milk and may harm a nursing baby. Second-generation over-the-counter medications like Claritin, Zyrtec, and Allegra which improve upon old options like Benadryl by not putting you to sleep are more similar than they are different. Print this page Add to My Med List. With or without a decongestant, Allegra, Claritin, and Zyrtec are all antihistamines, meaning they calm down your body's immune reaction to allergens like pollen or animal dander. We comply with the HONcode standard for trustworthy health information - verify here. Post a new comment Error. So which one should you choose? A previous version of this story appeared in [Subscribe to receive email notifications whenever new articles are published.](#) Death can occur from the misuse of cough and cold medicines in very young children. You can also find out whether any of your other medications will interact with Allegra, Claritin, or Zyrtec. This may sound obvious, but the key thing to pay attention to is not what's written on a box, but what actually works for you.
