Chapter 6 Antidysrhythmic agents. Journal of the American Society of Nephrology. Chapter 44 Antiplatelet agents. Chapter 33 Functional characterization of novel G protein-coupled receptors involved in nociception and HIV1 infection. Chapter 19 Challenges in antibacterial antifungal drug discovery. Its half-life is variable 316 hours, and is prolonged by heart and liver failure, as well as kidney failure. Views Read Edit View history. Chapter 17 Biomimetic synthesis of racemic alkaloids. The compound was protected by the U. In extreme cases, ramipril may lead to potentially fatal liver problems. Vaso-occlusive disorders including unstable angina, myocardial infarction, transient ischemic attacks, stroke and peripheral artery disease remain the major sources of morbidity and mortality in western civilization. Chapter 20 Cytochrome P in the metabolism of xenobiotics and drug-drug interactions. Ramipril, a prodrug or precursor drug, is converted to the active metabolite ramiprilat by carboxylesterase 1. Chapter 38 Angiogenesis and antiangiogenic drugs. ACE inhibitors inhibit the actions of angiotensin converting enzyme ACE, thereby lowering the production of angiotensin II and decreasing the breakdown of bradykinin. Chapter 21 Design and structure activity relationships of naphthalenic ligands of the melatonin receptors. Chapter 12 Progress in the development of potent and selective cholinergic channel modulators ChCMs. Originator Bristol-Myers Squibb; Developer Boehringer Ingelheim; Bristol-Myers Squibb; Mead Johnson; Menarini; Class Antihypertensives; Heart failure therapies; Imino acids; Organophosphorus compounds; Mechanism of Action ACE inhibitors. Orphan Drug Status. Orphan designation is assigned by a regulatory body to. Fosinopril (which has been launched as a once-daily antihypertensive agent) is a phosphinic acid prodrug which, after oral administration, undergoes rapid. Originator Bristol-Myers Squibb; Class Antihypertensives; Imino acids; Organophosphorus compounds; Small molecules; Mechanism of Action ACE inhibitors;. Filgrastim, Recombinant (immunostimulant) () Country of Origin: U.S.A. Originator: Amgen First Introduction: U.S.A. Introduced by: Amgen Trade Name: Neupogen CAS Registry No. Fosinopril Sodium (antihypertensive) () H.3 3 Q CH<sub>2</sub>(Cl-12)2CH<sub>2</sub> P Chap- 33 To Market, To Market1991 Strupczewski, Ellis Sigma-Aldrich offers Sigma-F, Fosinopril sodium for your research needs. Find product specific information including CAS, MSDS, protocols and references. Ramipril, sold under the brand name Altace among others, is an angiotensin-converting enzyme (ACE) inhibitor, used to treat high blood pressure (hypertension) and congestive heart failure. By inhibiting an enzyme, ACE inhibitors relax the muscles around small arteries (arterioles). The arterioles expand and allow blood. Bristol-Myers Squibb, Fosinopril, TABLET, 20mg, South Africa, Monopril, Originator, 30X1mg. Bristol-Myers Squibb (Pty) Ltd Bristol-Myers Squibb, Fosinopril, TABLET, 20mg, South Africa, Monozide, Originator, 30X1mg. Mylan (Pty) Ltd Mylan Inc.
