OR Don't have an Online Account? Cetirizine hydrochloride tablets, 10 mg. If you can't, consider an allergy medication with an added decongestant. Claritin-D, Allegra-D, and Zyrtec-D all contain a decongestant called pseudoephedrine, the same active ingredient that powers Sudafed. Most require a prescription, but Nasacort is one that just became available over the counter. You just have to answer a couple of basic questions to figure out which to choose. Pseudoephedrine's usefulness when making methamphetamine means that in the United States, these drugs need to be purchased directly from the pharmacist with a government ID. It's the one that gives you the individual the greatest relief with the fewest side effects at the lowest price. Tap continue and the remaining items will be transferred. Of course, it is always a good idea to talk to your doctor before trying any new medication. That said, they do have some very slight differences which probably aren't noticeable to every user. But if you can still breathe through your nose, proceed to Step 2. The same antihistamine in Zyrtec, for example, is available as Aller-Tec at Costco, as Wal-Zyr at Walgreens, or even totally "unbranded" almost anywhere. Zyrtec acts the fastest usually within one hour but is also the most likely to make you drowsy, so avoid driving, alcohol, and sedatives as you figure out how you react. Most importantly, talk to your pharmacist and a board-certified allergist. If your primary symptom is a stuffed up nose, you can also ask your doctor about decongesting nasal sprays. Products you might like With or without a decongestant, Allegra, Claritin, and Zyrtec are all antihistamines, meaning they calm down your body's immune reaction to allergens like pollen or animal dander. Your actual total can only be determined upon purchase at checkout. Not Available at Items listed as Not Available may not be sold in your store or may not be available at this time.
