Such statements are based on management's current beliefs and expectations and involve a number of known and unknown risks and uncertainties that could cause Teva's future results, performance or achievements to differ significantly from the results, performance or achievements expressed or implied by such forward-looking statements. However, the FDA has asked each of these manufacturers to test the drugs at full dose to see if they truly are the same as the brand-name antidepressant. Faced with doubts from consumers, the FDA first defended the drug. The FDA has required drug manufacturers to redo many of the tests from that lab, owned by the now-defunct Cetero Research, Securities and Exchange Commission. The FDA defended the practice, noting that generic drugs are tested on small numbers of healthy volunteers to see if they work the same as are "bioequivalent" to brand-name drugs. To find the most current information, please enter your topic of interest into our search box. The suit ended in a settlement in which Teva did not admit fault. Despite having stopped taking Teva's drug, Richards says he continues to have spasms several times a day. Forward-looking statements speak only as of the date on which they are made and the Company undertakes no obligation to update publicly or revise any forward-looking statement, whether as a result of new information, future developments or otherwise. Neither Teva, nor Impax Laboratories, which manufactures the pill, have admitted that there was anything wrong with the pills. In April, the agency stated that Teva's generic was "bioequivalent and therapeutically equivalent to He would soon discover that the lightning bolt that struck him down was an electrical storm taking place entirely in his brain: Cooperman's for-profit company, the ConsumerLab web site, tests nutritional supplements and generic drugs for potency and accurate labeling. Generic medications are generally safe and effective, because the Food and Drug Administration mandates tests to show that they are equivalent to the name-brand originals. A major reason generic drugs cost less than brand-name drugs is that generic drugmakers don't have to perform extensive safety and effectiveness testing. The agency was reluctant to expose these volunteers to the side effects of the higher-dose drug. FDA will continue to investigate these reports to ensure that it has all the facts about these treatment failures and will make recommendations to healthcare professionals and the public if the need arises. Teva and Impax Laboratories, which makes the drug for Teva, have recalled the drug. According to the group, there are more than 10, FDA-approved generic drugs in the U.S. Oct 4, - Generics giant Teva Pharmaceutical Industries (\$TEVA) is pulling its version of Wellbutrin XL. It's something more basic than that: After extended testing, the FDA determined that Teva's generic really isn't equivalent to the branded drug. For years, questions have swirled around. Feb 11, - In the past I have taken both brand name and generic Wellbutrin XL and noticed a significant difference. I've tried to switch from brand name to The Teva generic was pulled off the market after the FDA found that they were not complying with the approved formulation.
