Mevacor tends to enhance the blood-thinning effect of Coumadin. Special warnings about Mevacor Rare cases of muscle problems and liver problems have been associated with the use of Mevacor and other similar medicines. Do not take Mevacor if you are pregnant or could become pregnant during treatment. Unless you are directed to do so by your doctor, do not take Mevacor if you are being treated for liver disease. Grapefruit and grapefruit juice may interact with Mevacor. Discuss the use of alcohol with your doctor so that the potential for liver problems can be determined. It is recommended that liver function tests be performed by your doctor before treatment with Mevacor begins, at 6 and 12 weeks after your treatment has started or your dosage has been raised, and periodically about 6-month intervals thereafter. Children The safety and effectiveness of Mevacor has not been established in children. Mevacor is used to reduce the amounts of LDL bad cholesterol and total cholesterol in the blood. Do not take Mevacor without first talking to your doctor if you have liver disease. Alcohol should be used only in moderation. Possible food and drug interactions when taking Mevacor. Adjustments to any dose, as determined by your doctor, should be made at intervals of 4 weeks or more. If you have reduced kidney function, your doctor will be cautious about increasing your dosage of Mevacor. Shipping Options Reshipments Order Tracking. If any side effects develop or change in intensity, inform your doctor as soon as possible. Take each dose of Mevacor with a full glass of water. Cholesterol levels should be monitored periodically and consideration should be given to reducing the dosage of Mevacor if cholesterol levels fall below the targeted range. To get the full benefit of Mevacor , you need to stick to the diet and exercise program prescribed by your doctor.
