Scientists who developed Viagra, or Sildenafil Citrate, were hoping it could lower blood pressure and treat Angina a heart problem. They range from soft drinks that were originally laced with powerful mind-altering drugs to, medicines with unexpected, but profitable, side-effects. However, originally, WD was used for lubricating thankfully unused nuclear missiles during the Cold War era. They noticed sudden increased hair growth on their scalp, but also in less desirable places like their backs arms and legs, according to Hair Solution's history of the drug. It was not until the instrument-stabilizer was accidentally knocked off a shelf and appeared to walk across a desk that its inventor, Richard James, conceived of it as a toy, according to Adweek. But then, younger relation Joe McVicker, who was hired by the company in , discovered that the formula could be used as a pliable modeling clay, according to Ohio History Central. This resulted in "Pemberton's French Wine Coca" a dink that contained alcohol and cocoa leaf extract the same ingredient that makes cocaine. They created it through sealing together two shower curtains, which made the first layer of the bubbles. WD is most commonly used to protect metal implements from moisture and to loosen tight screws. Unsuccessfully, the pair tried selling the product first as wallpaper and later as greenhouse insulation. The slightly different spelling "frisbee" is now used for the toy. According to Sealed Air company legend , it was not until IBM launched the computer in that bubble wrap was first used for the purpose of keeping products safe in transit. You might be alarmed, but maybe not that surprised to hear that the blue, stinging liquid you have been gargling every morning was originally marketed as as a floor cleaner and a cure for gonorrhea, according to Freakonomics.
